Rosie-Lee by VQ Handcrafted Sound & Style

British audio brand VQ launch Rosie-Lee to make mornings that little bit more beautiful with a bedside DAB Digital Radio alarm dripping in class and craftsmanship

Rosie-Lee

September 26th 2017 – VQ are proud to launch Rosie-Lee a DAB Digital & FM alarm clock radio with Bluetooth and some of the most irresistible good looks and craftsmanship you'll find anywhere in the category.

It's fair to say there are two types of people in this world, morning people and well those that aren't – but no matter whether you spring out of bed or hide under the covers for a few more moments there is nothing more uplifting than your favourite song or some fun with your reliable radio DJ of choice; Evans, Grimshaw, O'Connell, Moyles et al. However, VQ have always had an eye on your

bedside thinking it could do with something more sophisticated, a little less plastic-y and certainly something better acoustically, enter Rosie-Lee.

Rosie-Lee features comprehensive radio reception with DAB, DAB+ and FM meaning you're sure to find the right station for an early morning wake up call. VQ maintain their commitment to including Bluetooth as standard in Rosie-Lee as in all their other models, so if you need stream your classic love mix from Spotify, Rosie-Lee is ready to serenade you.

No matter what you choose to listen to, it will be a pleasure with Rosie-Lee's acoustic innovations. VQ have pioneered (and patented) new Analogue Sound Processing technology a system of acoustic development focused on the materials used in speaker design and their harmonious co-existence, as opposed to simple computer trickery. The result of this delivers a; rich, warm, room-filling tone from the dual 5W stereo speakers that make speech and music a pleasure to listen to. A simple comparison would be to the connection one feels with Vinyl as opposed to CD.

This level of craftsmanship is not exclusive to the speakers, Rosie-Lee is after-all hand crafted with a body formed from a single piece of wood through an intricate multi-cut, forming and filling process before being wrapped in premium leatherette. Rosie-Lee also offers a choice of real wood finishes on the front fascia, all of which are left with an exposed grain.

With such impressive audio and a sleek sophisticated look, you'd be quite forgiven in thinking Rosie-Lee could well be more than just a morning companion, and indeed the design is equally at home in a refined study or nestled on a modern bookshelf.

About VQ

VQ is an independently owned British audio brand, born out of a desire to create products that perfectly combine Sound & Style. The multi-award winning product range is all designed and engineered at their UK headquarters.

Colour is an essential part of the VQ identity, for far too long black and silver have been the de facto choice for consumer electronics – but VQ see their radios as an essential part of interior décor. A feast of the eyes as well as the ears.
