Retro^{Mk II}

The Retro Mk II by VQ is a comprehensively connected digital radio no matter whether you're an Apple or Android user. The radio offers access to all the stations you could possibly want and when it's time for your own music the dock or wireless Bluetooth connection are easy to use and will perfectly compliment your radio listening.

You can listen to all your favourite stations and discover many more with Retro Mk II as the radio features reception for DAB / DAB+ Digital stations and a traditional analogue FM radio tuner. If you've never tried digital radio before now should be the time with more stations than ever before, and on digital you can search stations alphabetically, so it's easier than ever to find something you'll love. You might even find out your old favourite radio station isn't your favourite any more, but no matter how many new or old favourites you have, you should be able to save them all with sixty available presets.

When it's time to listen to your own music, audiobooks or podcasts connecting your phone, tablet or any other smart device couldn't be easier. If you're an Apple user the charge and play Lightning Dock means you can listen to music or any other content from your iPhone, iPad or iPod, while the device is powered up. If you're not an Apple user, not problem, the universal Bluetooth wireless connection means you can stream from any smart device, there's even a convenient USB charge port so you too can power-up your device from the radio.

No matter what you listen to, it will sound fantastic with the dual ultra-wide full range 10W stereo speakers, giving a room-filling 20W total output. You even have the opportunity to tailor the sound to your own personal taste with the comprehensive MyEQ equaliser function with a range of 6 presets or independent bass and treble control. Sound is entirely personal and subjective so this comprehensive equaliser means you can tailor the radio to your own tastes or for different music genres.

If you're planning on having Retro Mk II at your bedside, you'll be pleased to know the radio features a dual alarm clock. This flexible alarm function means two independent alarms can be set for; once only, daily or an intelligent week/weekend setting. The choice of what you rise to is entirely yours as well with digital radio, FM radio or a classic buzzer tone.
